

TEAM CASE – BLACK AND DECKER

Answer the following question from the perspective of an external advisor to Bill Lancaster.

DECISION AND ANALYSIS

Decide on which system Lancaster should consider implementing. In doing so:

- Choose one of these three options in total. In doing so, explain why with support coming from a pro / con analysis.
 - The hybrid proposal developed by Anita Lim.
 - Going “full speed ahead” with the ADP implementation, and use it as it has been used successfully in the U.S.
 - Holding off on the implementation of any sort of management tool and keep doing what they have been doing (MBO).
 - i. Consider the pros and cons of each.

Include in your analysis considerations of the following:

- Should your plan be introduced to the entire Eastern Hemisphere organization at the same time? Why or why not?
- Should ADP be standardized or modified? If standardized, why? if modified, how?
 - By country
 - By level in the organization (manager versus employee)
 - Limited feedback (not 360* but something else)
 - Other considerations
